Reuben R. Tharakan

4470 Egret Ave Cumming, GA 30041| (470) 385-9656 | rtharakan6@gatech.edu | U.S. Citizen

Objective

A university student pursuing a degree in Computer Engineering that is eager to learn and benefit from new experiences. Has a constantly expanding interest in Computer Engineering, Cyber Security, and Technology specifically in the realm of chip design and cybersecurity protection modules. Worked extensively on machine learning and AI research teams and as a cyber security threat analyst to further his knowledge and utilize my skills. Is currently seeking an internship in software development and cyber security starting June 2026.

Education

Georgia Institute of Technology | Atlanta, GA *Expected Graduation, May 2028*
Bachelor of Science in Electrical Engineering, GPA 3.82

Skills

Programming: Java, Python, Rust (basic)
Systems & OS: Linux, Windows, AWS (EC2, IAM basics)
Cybersecurity: SIEM, Network Security, Packet Analysis, Malware Analysis, OWASP Top 10
Tools: Wireshark, Nmap, Kali Linux, Altium Designer, Git, VS Code
Hardware: PCB Design, Digital Systems, Crimping, Soldering
Data & Math: Data Structures, Algorithms, Linear Algebra, Sensor Fusion
Communication: Technical Documentation, Client Demos, Presentations

Experience

Genix Cyber, Cumming, GA Aug 2024 – Aug 2025
Cyber Security and Sales Intern

- Worked 15 hour weeks on the SIEM and AI module, ARGUS. Wrote documentation and tested use cases for the product's malware detector, virus analyzer, and packet sniffer.
- Handled contacting possible clientele on the sales side as well, communicating with 200+ companies. Collaborated with numerous groups to grow the company's client list and demo the SIEM and AI module.

The MetroMax Group, Cumming, GA Jul 2023 – Jan 2024
AI Research Intern

- Managed AI Research and Implementation team for the MetroMax Group.
- As a part of this, found many possible AI implementations and began the developmental and training stage of a customer service chatbot and LLM.

Projects

Chebychev Research | Propulsive Landers *Spring 2026*

- Preparing an AIAA paper on propulsive landing GN&C (Guidance, Navigation, and Control) with algorithm design and simulation validation.
- Employing Chebychev polynomials and their use with navigation algorithm efficiency

Keychain Project | HyTech Racing *Fall 2025*

- Utilized Altium Designer to develop and design integrated circuits and printed circuit boards (PCBs) during onboarding and training.
- Designed electrical components on a dashboard design team to be utilized within the vehicle

Relevant Coursework

- Intro to Object Oriented Programming, Data Structures and Algorithms, Intro to Discrete Math in CS, Linear Algebra, Multivariable Calculus, Digital System Design, Differential Equations, Physics

Leadership or Activities

Propulsive Landers | GNC Member *Aug 2025 – Present*

- Built control algorithms to implement TVC movement inertia physics onto a hybrid rocket.
- Linearized noisy sensor data as a member of the sensor fusion sub team using extended Kalman filters.
- Developing rust programs to parse data from LiDAR, GPS, IMU (9-axis), and Ultra-Wideband sensors

HyTech Racing| Electrical Member *Aug 2025 – Present*

- Assisted in dashboard design and electrical wiring, applying hands-on skills in crimping, soldering, and foundational electrical theory.
